

TOP 12 STATES THREATENED BY EPA'S OZONE RULE

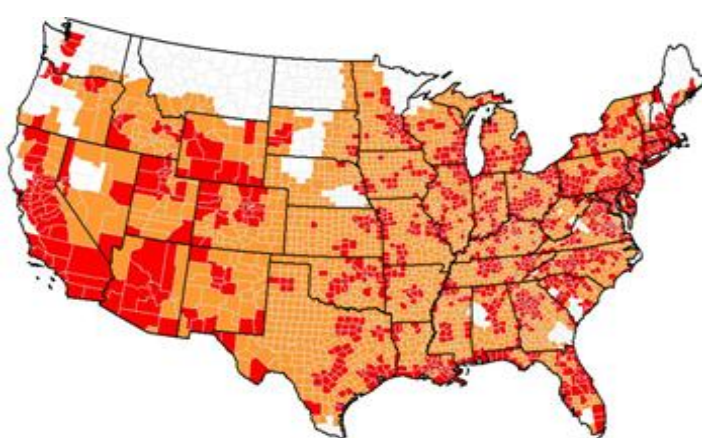

The Environmental Protection Agency is expected to propose draconian cuts in ozone levels that will destroy jobs across the country.

EPA's new ozone rule could be the costliest regulation in American history.

But here's the catch...strict ozone regulations are already in place.

Here are the states that violate EPA's current ozone standard:

Here are the states that could face penalties under EPA's expected standard:

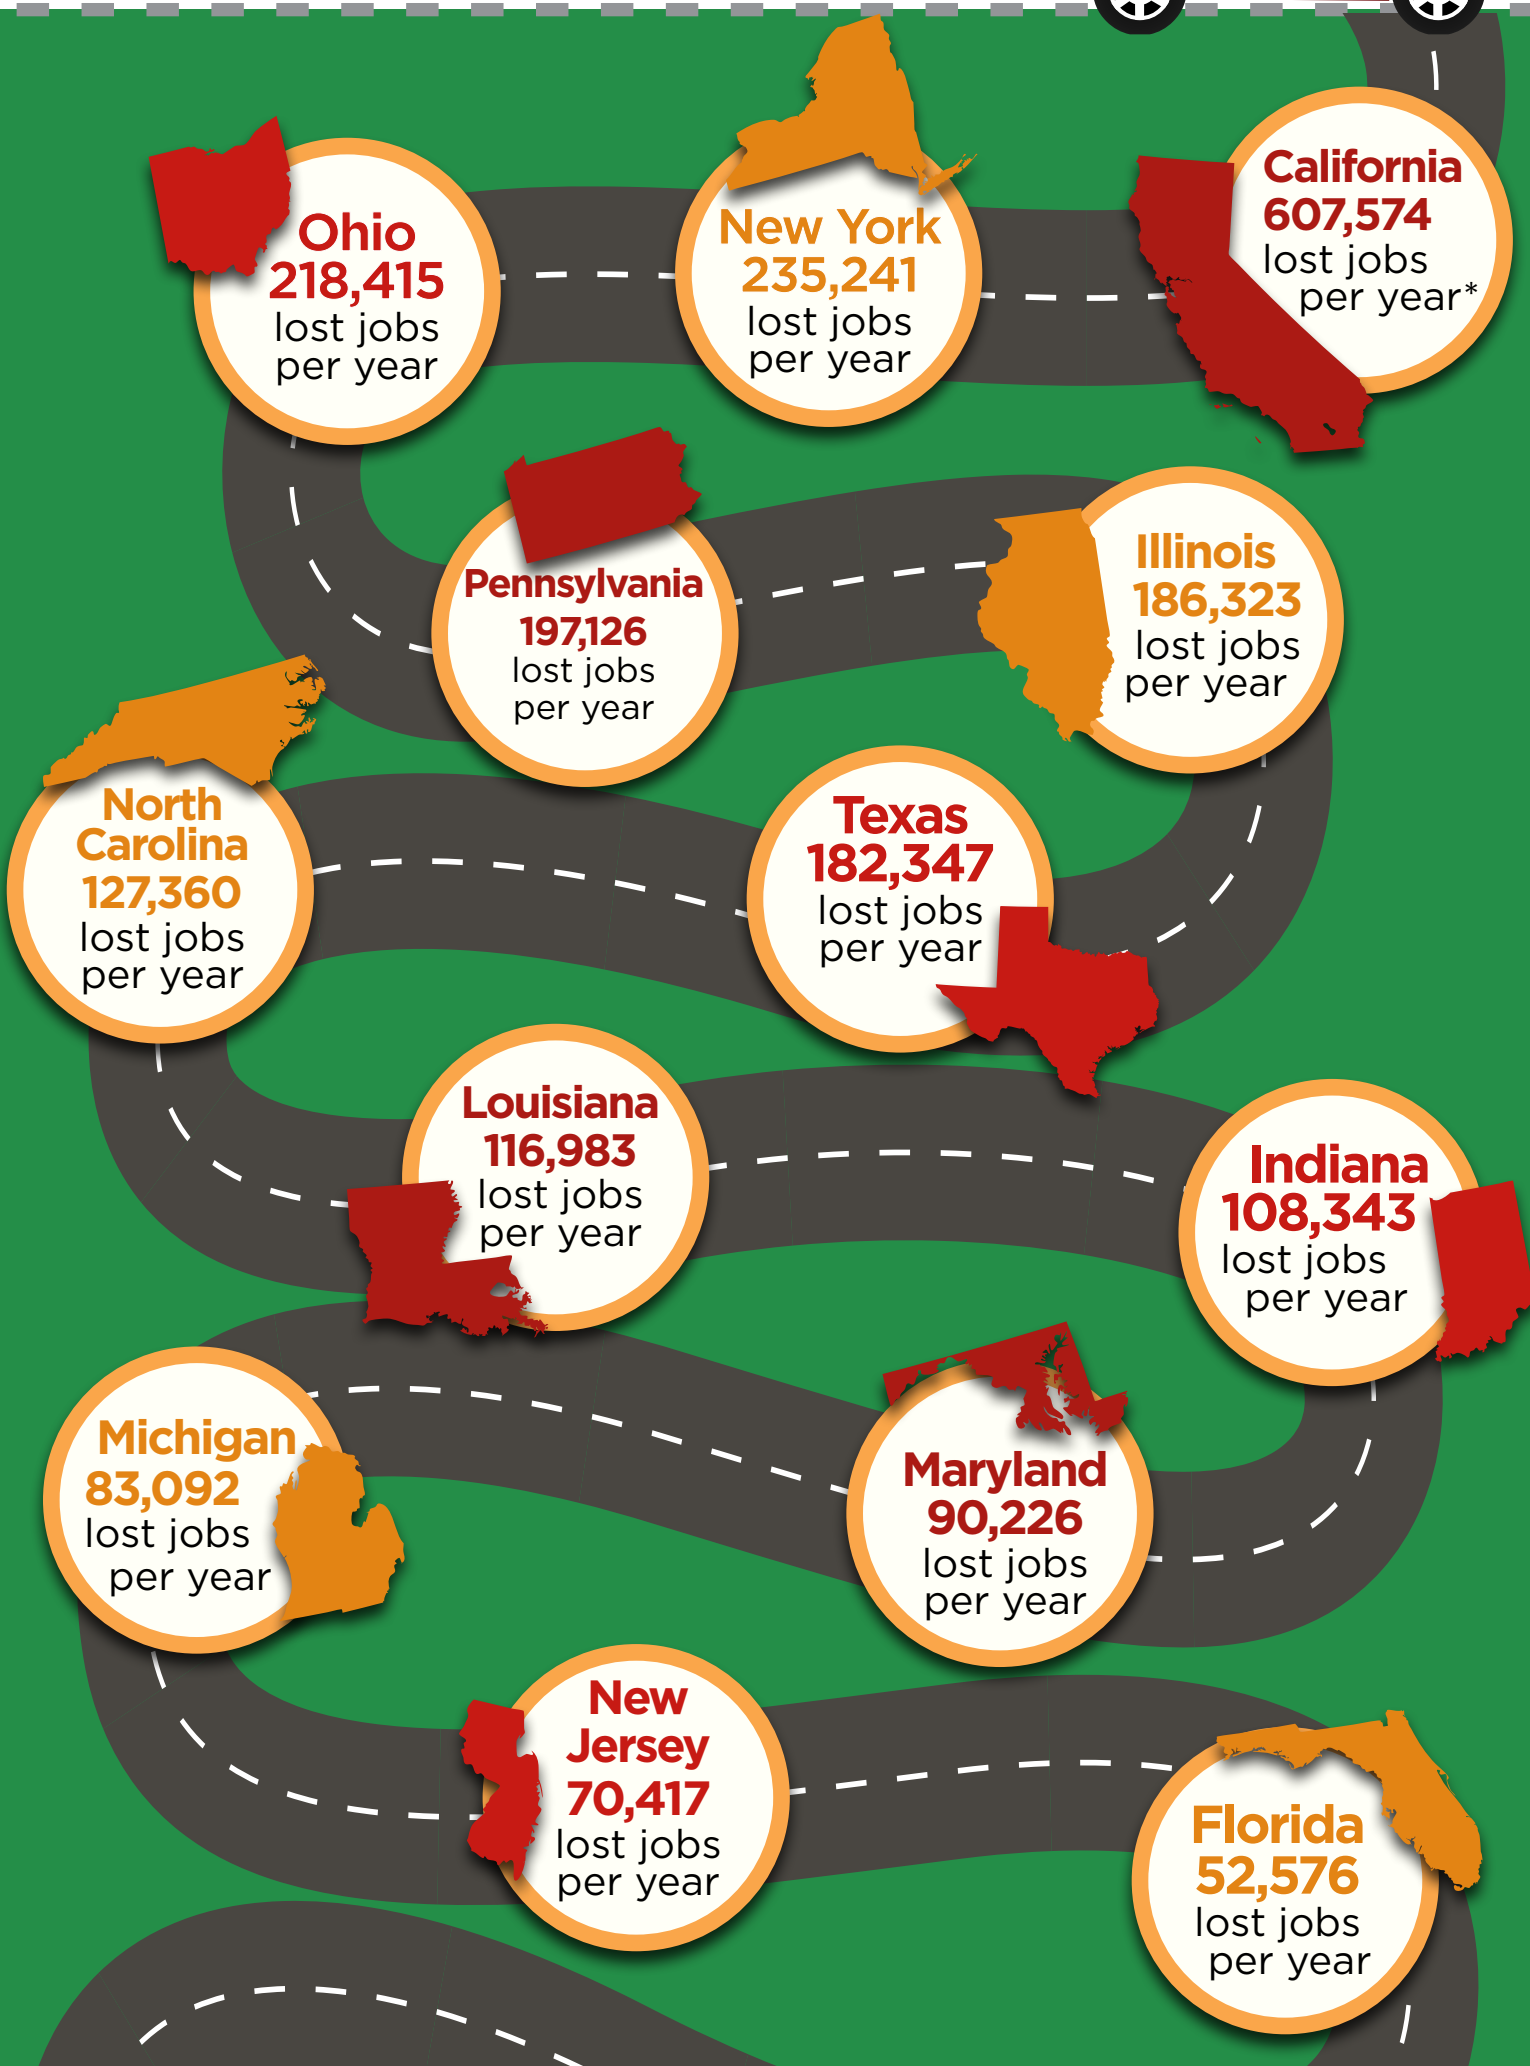

As you can see...

By further tightening the regulation, EPA may put most of the United States into non-compliance. This will cost millions of jobs without improving public health.

Clearly, EPA is power drunk on a regulatory joyride and the American people are stuck paying for the trip.

Here's how the proposed ozone regulations would affect some of our biggest states:

*Lost jobs measured as job equivalents, which equals total labor income change divided by average annual income per job. Estimates represent the average annual impact from 2017 through 2040.

If you're not already angry about EPA's future ozone rule, then consider this...

In 2008, EPA itself concluded that the current ozone standard already protects public health.

And ozone emissions have actually declined more than 13% over the last decade.
